

Transforming Teens, Changing Communities

The Challenge: 13.5 million young people live in poverty.

Risky behaviors - like dropout or teen pregnancy - lead to a lifetime of consequences. Wyman has changed the lives of 125,000 of these teens in the last five years, but we've got more work to do.

Wyman's Solution:

A multi-level approach that transforms teens and communities.

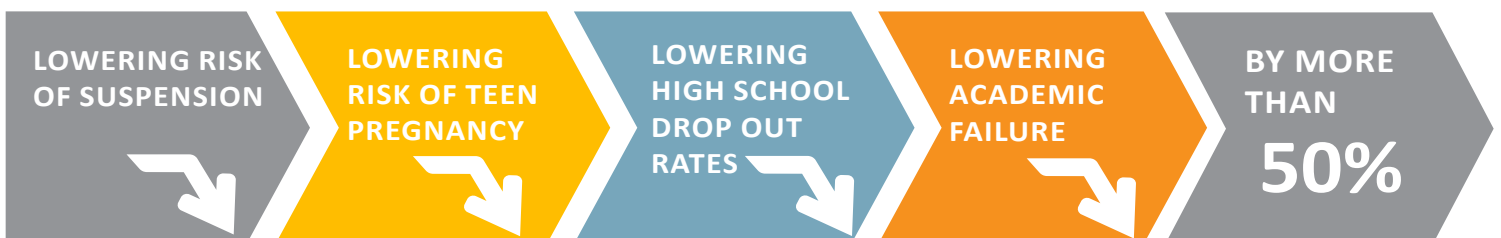

1. Empower Teens. Wyman's programs help teens thrive, not just survive. Our proven approach blends peer groups, trained adults, engaging curriculum and community service learning over time.

2. Train Adults. Wyman partners receive innovative training to help them interact with teens differently, honor teen voice and build teen potential. In turn, more than 2,000 adults and 300 organizations are changing the lives of more than 35,000 teens annually nationwide.

3. Strengthen Communities. As a trailblazer in evidence-based youth development strategies, we advocate to improve systems and policies so that communities have the resources they need to help teens become leaders with a powerful vision for their future.

Teens Need Wyman. Wyman Needs You.

1. Be a partner.
2. Fund the need.
3. Influence policy.
